

HW 3 – construction of the pyramid

In MP construct related views of the regular pyramid with a square $ABCD$ as the base, the axis $o([-40,0,80],[60,100,0])$ of the base, the point $A[30,60,65]$ of the base and height $h=70$ of the pyramid are given. The main vertex (apex) of the pyramid lies above the plane of the base.
