

1. Find trace points of the line  $a$ .

2. The point  $A$  and the straight line  $b$  are given. Construct a parallel line with the line  $b$  passing through the point  $A$ . Construct the traces of the plane  $\alpha(a, b)$ .

3. Construct the intersection  $r$  of planes  $\alpha$  and  $\beta$ .

4. Find the intersection of the line  $a$  and the plane  $\rho$ .
